

# **Cost of solar panels with battery backup**

## Overview

---

How much does solar and battery backup cost?

Whole home battery backup can cost around \$20,000 or more in batteries and related equipment on top of the cost of a solar system. This does not include the costs of any solar system components or installation costs. How long do solar and battery backup systems last?

.

How much does it cost to add battery backup?

The cost of adding a whole home battery backup roughly starts at around \$10,000, though this does not include the costs of any solar system components or installation costs. Whole home battery backup can run you around \$20,000 or more in batteries and related equipment, on top of the cost of your solar system.

What are battery backup solar panels?

Battery backup solar panels are storage systems containing batteries like LG Chem batteries and Tesla Powerwall. They store energy generated by solar panels during cloudy days or nighttime and use it to power appliances when the solar panels aren't generating electrical energy.

Do solar panels need a backup?

A quality solar system can also continue collecting energy from the solar panels during a power outage, so that the battery is not instantly depleted, though this will depend on the weather. There are a few different levels of backup for solar panels — partial or full. To determine which one you need, it might be worth considering:.

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably

expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

How do I size a solar battery backup system?

To correctly size a solar battery backup system, you'll need to know your daily electricity consumption, which is indicated in kWh on your electricity bill. For instance, an average U.S. household consumes 30 kWh daily.
