

Cost-savings solar battery storage birmingham uk

Overview

How much does a solar battery storage system cost?

The total cost to install a solar battery storage system, including a 4kWh battery, inverter and PV system, comes in at around £12,000 on average. How long will a 10kW home battery last?

The average solar battery storage system lasts around 10 to 15 years. This is provided it's properly installed and well-maintained.

Can solar battery storage save you money?

Reducing your energy bills and storing extra energy with the best solar battery storage in the UK is no longer new. Yet solar panel storage opens up ways to potential income and even the possibility of becoming a self-sufficient homeowner with off-grid solar panels.

How can I save money using my solar battery?

One of the better ways you can save money using your solar battery is through the Smart Export Guarantee (SEG), by exporting any excess electricity generated that your battery stores back to the National Grid. Here are the numbers for some common solar panel sizes: Prices and savings figures shown are estimates.

What is the 0% VAT scheme for solar battery storage?

Starting from February 1st, 2025, the UK government has expanded the 0% VAT scheme to include solar battery storage systems. This applies to new installations of solar panels and batteries together, retrofitting batteries into existing solar panel setups, and standalone battery storage systems linked to the grid.

What are solar battery storage systems?

Simply put, solar battery storage systems allow you to store electricity

generated from the sun via your solar panels to use in the evening or at a later date. This allows you to use the electricity you generate, meaning you have less to buy from the grid. But the benefits don't end there. The latest solar battery storage systems also offer:

Are solar battery storage systems becoming more in demand?

With energy prices rising, it's no wonder solar battery storage systems are becoming more in demand. Many homeowners are wising up to storing their excess solar energy, rather than it funnelling back to the grid.
