

Current status of energy storage development in europe

Overview

The 2025 report highlighted the urgent need to quickly deploy more energy storage infrastructure across the EU. In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across.

The 2025 report highlighted the urgent need to quickly deploy more energy storage infrastructure across the EU. In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across.

MUNICH, Germany (Wednesday 7th May 2025): New analysis reveals another year of record installations for European* battery storage, despite slower year-on-year growth, according to the latest European Market Outlook for Battery Storage. 15% growth. Battery storage forecast. Drivers for battery.

Since 2020, the Commission publishes yearly progress reports on the competitiveness of clean energy technologies that present the current and projected state of play for different clean and low-carbon energy technologies and solutions. The 2025 report highlighted the urgent need to quickly deploy.

Pumped hydro is the most widely used technology for energy storage in Europe and worldwide, but batteries and hydrogen have come into the spotlight over the last decade as a recent trend in the energy storage market. However, despite an exponential growth in Europe's battery energy storage.

The latest edition of the European Market Monitor on Energy Storage by LCP Delta and The European Association for Storage of Energy (EASE), released today, highlights Europe's rapid expansion in energy storage capacity, which reached 89 gigawatts (GW) by the end of 2024. The report also projects.

A total of 11.9GW of energy storage across all scales and technologies was installed in Europe in 2024, bringing cumulative installations to 89GW. According to the ninth annual edition of the European Market Monitor on Energy Storage (EMMES) from trade association European Association for Storage.

A new interactive platform—the European Energy Storage Inventory —has been launched to provide near real-time insights into energy storage deployment across the EU, marking a major step toward a smarter and more sustainable energy system. Developed as part of the REPowerEU Plan, the platform is the.

Current status of energy storage development in europe

CURRENT STATE AND PERSPECTIVES OF PUMPED ...

Overview Power systems around the world are facing the major challenge of transitioning from a largely fossil-based system to a renewable one. In Europe in particular, with the "Clean energy ...

Europe Energy Briefs - Europe's energy storage outlook

The study highlights the recent Clean Industrial Deal with new state aid rules and the Affordable Energy Action Plan as promising for driving ...

Carbon capture, utilisation and storage in the European Union

Clean Energy Technology Status, Value Chains and Market: covering advanced biofuels, batteries, bioenergy, carbon capture utilisation and storage, concentrated solar power and ...

Global Energy Storage Trends in the EU, Türkiye, and ...

Trends in energy storage around the globe include regulations and initiatives in the European Union, incentives in Türkiye, and the

UK ...

BATTERIES FOR ENERGY STORAGE IN THE EUROPEAN ...

How to cite this report: M. Bielewski, A. Pfrang, S. Bobba, A. Kronberga, A. Georgakaki, S. Letout, A. Kuokkanen, A. Mountraki, E. Ince, D. Shtjefni, G. Joanny, O. Eulaerts, M. Grabowska, Clean ...

Current status of chemical energy storage technologies

Trends in research, development and deployment in Europe and the rest of the world
Current status of chemical energy storage technologies

Recommendations on energy storage

The Commission adopted in March 2023 a list of recommendations to ensure greater deployment of energy storage, accompanied by a staff working document, providing an outlook of the EU's ...

HYDROPOWER AND PUMPED HYDROPOWER ...

-Energy-Food-Ecosystem) nexus, especially in the EU (SWOT in Table 1). Hydropower is a renewable and flexible energy source, and its flexible operation and storage capacity allow to ...

The Development of Renewable Energy in the Electricity Market

Renewable energy sources (RES) play a crucial role in the decarbonisation of the electricity system. Their share in electricity production has grown significantly since 2005 and it is ...

Solar energy in the EU

EU measures to boost solar energy include making the installation of solar panels on the rooftops of new buildings obligatory within a specific timeframe, streamlining permitting procedures for ...

The European Energy Storage Inventory: A comprehensive ...

Current development in the energy infrastructure: the new EU dashboard for energy storage The European Commission officially introduced the "European Energy Storage ...

[European Market Outlook for Battery Storage 2025-2029](#)

Recently, SolarPower Europe has also launched our Battery Storage Europe Platform, bringing BESS' critical role in EU energy security and competitiveness to the forefront ...

[Clean Energy Technology Observatory, Carbon capture ...](#)

This report provides an overview of the current status, value chains and market positions of carbon capture utilisation and storage (CCUS) technologies in the EU as well as ...

The European Energy Storage Inventory: A comprehensive ...

The European Energy Storage Inventory provides impressive figures on the current state of energy storage capacities in Europe. According to the platform, 905 projects ...

[Europe's battery energy storage boom: Record growth...](#)

Revenue stacking models - where batteries participate in energy arbitrage, grid balancing, and capacity mechanisms - are already ...

[Publications Office of the European Union](#)

This report provides an overview of the current status, value chains and market positions of carbon capture utilisation and storage (CCUS) technologies in the EU and globally. ...

Development status, policy, and market mechanisms for battery energy

Then, the challenges of the current development of battery energy storage are analyzed, and suggestions are made in terms of policies and market mechanisms, so as to ...

[Market Analyses , EASE: Why Energy Storage? , EASE](#)

The ninth edition of the European Market Monitor on Energy Storage (EMMES) by the European Association for Storage of Energy (EASE) and LCP Delta, is ...

[Market Analyses , EASE: Why Energy Storage? , EASE](#)

The database of over 2,600 projects includes detailed data on current installations by customer segment (residential, C& I and front-of-meter) across 24 European ...

Energy Storage Grand Challenge Energy Storage Market ...

This data-driven assessment of the current status of energy storage markets is essential to track progress toward the goals described in the Energy Storage Grand Challenge and inform the ...

Global Energy Storage Trends in the EU, Türkiye, and the UK

Trends in energy storage around the globe include regulations and initiatives in the European Union, incentives in Türkiye, and the UK government's push for new energy ...

[Current status of ground source heat pumps and ...](#)

For cooling purposes, but also for the storage of solar or waste heat, the concept of underground thermal energy storage (UTES) could prove ...

A review of the current status of energy storage in Finland ...

A review of the current status of energy storage in Finland and future development prospects This is an electronic reprint of the original article. This reprint may differ from the original in ...

[Key Projects, Initiatives and Market , JRC SES](#)

The EU is advancing several key projects and initiatives in the energy storage field to boost renewable energy integration, stabilize the grid, and support clean energy goals. These ...

Hydropower in Europe: Current Status, Future Opportunities

This commitment to research and development, as well as to commercialization of new designs, continues today throughout Europe. Installed hydropower in Europe totals ...

[Rapid expansion of Europe's storage - new report](#)

The latest edition of the European Market Monitor on Energy Storage by the European Association for Storage of Energy and LCP Delta, released on 31 March, highlights ...

[The European hydrogen policy landscape](#)

This report aims to summarise the status of the European hydrogen policies and standards landscape. It is based on the information available at the European Hydrogen Observatory ...
