## Overview

---

How does the Czech government subsidise photovoltaic panels?

The Czech government subsidises the installation of photovoltaic panels located on domestic properties producing energy for their own consumption and the purchase of co-located energy storage solutions. These subsidies are provided under the “New Green Savings Programme” administered by the State Environmental Fund.

Is there a future for energy storage in the Czech Republic?

Despite the ongoing discussions, there is no significant development in the area of energy storage. In 2015, the Czech Government adopted the National Action Plan for Smart Grids (“NAPSG”) prepared by the Ministry of Industry and Trade under principles set out in the update of the State Energy Concept, which was also introduced in 2015.

What type of electricity storage is used in Czech Republic?

Batteries and thermal energy storage are the two most commonly used methods of electricity storage for households in the Czech Republic. 2. What electricity storage projects are anticipated in your jurisdiction in coming years?

.

Does the Czech government provide subsidies for electricity storage?

However, the Czech government provides subsidies to household projects consisting of photovoltaic panels with electricity storage systems. Batteries and thermal energy storage are the two most commonly used methods of electricity storage for households in the Czech Republic. 2.

What is the state energy policy of CZ?

State Energy Policy of CZ: approved in 2015, measures assessed annually, it is

currently being updated (12th of April Government approved „Framework document“ link). Climate Protection Policy of CZ: approved in 2017; represents a climate strategy until 2030 as well as a low-emission economy development plan until 2050; currently also being updated.

How does the Czech Republic prepare a national energy and Climate Plan?

As a measure for regional cooperation in the field of RES, the Czech Republic also prepares the national energy and climate plan as such. On the basis of this planning document, it will be possible to compare planned national approaches and, where appropriate, identify options for joint RES projects and/or cross-border impacts of policies.
