

# **Deep cycle lead acid solar battery tractor supply**

## Overview

---

What is a deep cycle lead-acid battery?

A deep cycle lead-acid battery is a type of battery that can regularly deeply discharge using most of its capacity. Unlike standard lead-acid batteries, deep cycle batteries use thicker lead electrodes and separators to increase the depth of discharge.

What is a deep cycle battery?

Unlike starting batteries, deep-cycle batteries are designed to deliver a slow, steady stream of amps for hours. While they could deliver a burst of power, they won't be able to do it more than a couple times before failing. If you need one battery for both deep cycling and cranking engines, then go for dual-purpose batteries.

What kind of batteries are available at Tractor Supply?

Deep cycling, cranking and dual purpose marine batteries are available from Tractor Supply. Trust the performance of Traveller Powered by Interstate Batteries for every trip on the water.
