

Domestic energy storage supplier quotation in Cyprus 2026

Overview

Will Cyprus install a lithium-ion battery storage system in 2026?

Additionally, Cyprus plans to install lithium-ion battery storage systems starting in 2026, with a target capacity of 160 MW by 2030, offering at least 2-4 hours of energy storage. In 2022, renewable energy sources accounted for 16.96% of total electricity production, up from 14.84% in 2021.

How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021. The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as “the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems,” adding: “During the day we waste megawatt-hours because we lack storage, and at night we are one step away from blackouts.”.

Why is Cyprus developing its electricity market?

Cyprus has put all its efforts into developing its electricity market, aiming to alleviate energy curtailments and improve energy security.

How many megawatts can a battery store in 2026?

The planned battery storage infrastructure, to be installed between 2026 and 2030, will have a total capacity of 160 megawatts with the capability to store renewable energy for 2-3 hours, Papanastasiou told the House Energy Committee.

Should the European Union invest in hydrogen storage technology?

Renewable Energy Association President Fanos Karantonis advocated for hydrogen storage technology investment, noting significant European Union funding in this direction, while the Cyprus Biogas Association highlighted that existing storage schemes focus exclusively on battery technology.
