

# Ema energy storage

## Overview

---

What does EMA stand for?

Singapore, 22 October 2024 – The Energy Market Authority (EMA) has awarded grants totalling \$7.8 million to two companies to explore solutions that could enhance the cost-effectiveness and optimise the space required for energy storage systems (ESS).

What does EMA do?

the Ministry of Trade and Industry. Our main goals are to ensure a reliable and secure energy supply, promote effective competition in the energy market, and develop a dynamic energy sector in Singapore. Through our work, EMA seeks to forge a progressive en.

What are energy storage systems?

TORAGE SYSTEMS 1.1 IntroductionEnergy Storage Systems (“ESS”) is a group of systems put together that can store and release energy as and when required. It is essential in enabling the energy transition to a more sustainable energy mix by incorporating more renewable energy sources that are intermittent.

Why is energy storage important in Singapore?

Mr Pua Kok Keong, Chief Executive, EMA said: “As Singapore expands solar deployment, energy storage systems will become more important to enhance grid resilience and ensure power system stability. I welcome the development of energy storage systems that are safe, cost-effective and space-efficient.” -- End -- About the Energy Market Authority.

Where can I find information about EMA?

Visit for more information. About SP Group SP Group is a leading utilities group in the Asia Pacific, empowering the future of energy with low-carbon, smart energy solutions for its customers.

Why is energy storage important?

It provides ancillary services to the market by regulating and reserving energy, contributing to grid stability and reliability. It can swiftly respond to power fluctuations within the grid, ensuring a reliable and consistent energy supply. The different types of energy storage system technologies
