

# **Energy storage battery on-site inspection**

## Overview

---

What is sat for energy storage battery systems?

SAT for energy storage battery systems aims to: Verify Installation: Ensure the system is installed according to specifications and standards. Perform Integration Testing: Confirm integration with the site's electrical and control systems. Validate Performance: Ensure the system operates as expected in its operational environment.

What are the two phases of energy storage battery testing?

When it comes to ensuring the quality, performance, and reliability of energy storage battery systems, two critical phases stand out: Factory Acceptance Testing (FAT) and Site Acceptance Testing (SAT).

What is the energy storage Inspector?

The web app can be used to compare the most important efficiency characteristics of the analyzed storage systems. The Energy Storage Inspector is continuously being expanded to include new products. Interested manufacturers can contact the Solar Storage Systems Research Group at HTW Berlin directly.

How many photovoltaic battery systems have been evaluated?

“Since 2018, we have evaluated over 90 photovoltaic battery systems as part of our Energy Storage Inspection. This is the first edition to include a battery system with multilevel-technology,” says Dr. Johannes Weniger, initiator of the Energy Storage Inspection.

What is the energy storage inspection 2025?

The Energy Storage Inspection 2025 was developed as part of the „Perform“ project, which is funded by the Federal Ministry of Economic Affairs and Climate Action (BMWK). 22 home storage systems have been evaluated by the HTW Berlin, including new products from Fox ESS, Fronius, Kostal and SAX

Power.

What are the primary objectives of FAT for energy storage battery systems?

The primary objectives of FAT for energy storage battery systems include:

**Verification of Design and Specifications:** Ensuring the system meets the design specifications and performance requirements outlined in the contract.

**Functional Testing:** Confirming that the system operates correctly under different conditions and scenarios.

## Energy storage battery on-site inspection
