

# **Energy storage industrial park application**

## Overview

---

Do energy storage systems work in industrial parks?

Currently, various energy storage systems, particularly heat and electricity storage, operate independently in industrial parks. Typically, stored thermal energy is not used to electricity generation.

How can big data industrial parks improve energy storage business model?

Combined with the energy storage application scenarios of big data industrial parks, the collaborative modes among different entities are sorted out based on the zero-carbon target path, and the maximum economic value of the energy storage business model is brought into play through certain collaborative measures.

What are the advantages of hybrid energy storage in industrial parks?

The advantages of the hybrid energy storage system in industrial parks were also discussed in terms of sustainable development, climate change mitigation, social impact, and other aspects.

How can energy storage benefits be improved?

By adjusting peak and valley electricity prices and opening the FM market, energy storage benefits can be greatly improved, which is conducive to promoting the development of zero-carbon big data industrial parks, and technical advances are beneficial for reducing investment costs.

How important is heat & electricity in industrial parks?

According to the IEA's Renewables 2019 Analysis and Forecast to 2024 report, heat accounted for 50 % of global final energy consumption in 2018, underscoring the equal importance of heat and electricity. Efficiently converting stored heat to electricity in industrial parks remains a significant challenge.

How can a big data industrial park achieve zero carbon?

Scenario design for the zero-carbon big data industrial park In this study, the big data industrial park adopts a renewable energy power supply to achieve the goal of zero carbon. The power supply side includes wind power generation and photovoltaic power generation and gains profits through arbitrage of peak-valley price difference.
