

Energy storage industry acquisitions

Overview

Analysis of the key themes driving M&A activity reveals that energy storage accounted for 52 power deals announced in Q3 2024, worth a total value of \$7.8bn. The \$3.2bn minority acquisition of Vistra Vision by Vistra was the industry's largest disclosed deal. How much money did energy storage companies make in 2022?

Corporate funding of energy storage companies exceeded US\$26 billion worldwide in 2022, a 55% jump from 2021's total US\$17 billion. Masdar acquires UK battery storage developer Arlington Energy October 26, 2022 Masdar has acquired battery storage developer Arlington Energy in a bid to expand its presence in UK and European renewables markets.

Who owns Blackstone battery energy storage system?

In Q4 2023, renewable energy company Octopus Investments Australia, which is majority owned by the UK-based Octopus Group, acquired the Blackstone Battery Energy Storage System. With an expected enterprise value of US\$514 million once operational, it is the largest proposed battery project in the state of Queensland.

What is the future of battery storage?

The US is leading the global race in the development of battery storage, with demand for BESS expected to increase sixfold by the end of the decade. Capacity is expected to almost double in 2024 to more than 30 GW, as development of energy storage projects accelerates in line with the rapid growth of variable solar and wind assets.

Are Spain's Energy Storage Startups attracting investors?

Spain's energy storage startups are also attracting investor attention. Earlier in the year, Spanish solar energy firm Soltec announced an investment in energy storage startup Silbat, building its stake to 12.2 percent.

What is a battery energy storage system?

Battery energy storage systems (BESS), which enable utility companies and grid operators to access pools of surplus renewable energy on demand that would otherwise be wasted, play a central role in the global energy transition.

Is the UK ready for the next big thing in battery storage?

The UK's battery storage capacity is projected to expand to 24 GW by 2030, attracting investments of up to US\$20 billion and accounting for 9 percent of global installation capacity. Major private investors are looking to the UK for the next big thing in battery storage.
