## Overview

---

Are mica films magnetron sputtered by different insulating layers good for energy storage?

However, conduction losses rise sharply at elevated temperature, limiting the application of energy storage capacitors. Here, the mica films magnetron sputtered by different insulating layers are specifically investigated, which exhibit the excellent high-temperature energy storage performance.

Who makes Mica dielectric capacitors?

As the inventor of the mica capacitor, we are the world's foremost authority and largest manufacturer of mica dielectric capacitors. Our RF mica capacitors feature superior high Q performance without the undesirable properties associated with ceramic and porcelain capacitors.

Can mica be used as energy storage dielectrics?

In recent years, mica has a tendency to be used as energy storage dielectrics. As shown in Figure S1, compared with other thicknesses, mica with a thickness of 10  $\mu\text{m}$  has the most excellent energy storage performance at high temperature.

Can pmma/2d nanocomposite be used for high-density energy storage capacitors?

This excellent capacitive and energy storage performance of the PMMA/2D Mica heterostructure nanocomposite may inform the fabrication of thin-film, high-density energy storage capacitor devices for potential applications in various platforms.

Which mica thickness is best for energy storage?

As shown in Figure S1, compared with other thicknesses, mica with a thickness of 10  $\mu\text{m}$  has the most excellent energy storage performance at high temperature. On the one hand, mica stripped to 10  $\mu\text{m}$  can show good

flexibility and work stably for a long time at 1100°C.

Why should you choose Cornell Dubilier RF mica capacitors?

Our RF mica capacitors feature superior high Q performance without the undesirable properties associated with ceramic and porcelain capacitors. Cornell Dubilier mica capacitors are extensively used in military, aerospace and medical applications, offering both COTS and Military Grade capacitors with established reliability.
