

Energy storage pet cable tie

Overview

What is a dog tie out cable?

A dog tie out cable is a cable made of galvanized steel with crack-resistant polyvinyl for strength and durability. It is designed to provide safe and secure anchoring for your dog.

Why do dogs need a swivel tie-out cable?

These materials are strong and can withstand the pulling and tugging of your dog. A swivel mechanism allows the tie out cable to rotate freely, preventing it from getting tangled or twisted. This is especially important for active dogs who tend to move around a lot.

What if my dog's cable is too short?

Too short of a cable can restrict your dog's movement, while too long of a cable can pose a safety hazard. The material of the tie out cable can affect its durability and strength. It is recommended to choose a cable made of high-quality materials such as steel or heavy-duty nylon.
