

Energy storage technology and application exhibition

significant annual event held at the Shanghai New International Expo Center.

Established in 1986, EP is organized by the China Electricity Council, co-organized by Adsale Exhibition Services Ltd, and fully supported by all major Power Group Corporations and Power Grid Corporations. Over 30 years successful track record and experience, it has become the largest and the most. What is the energy storage exhibition & docking platform?

It is one of the most influential industry exchange and docking platforms in the global energy storage field, and is known as a high-standard exhibition with high gold content and strong guidance in the energy storage industry. It is a weathervane for the development of China's energy storage industry.

What is China International Energy Storage Conference?

The China International Energy Storage Conference is a platform focusing on industrial energy storage manufacturing. Here we showcased new technologies and were very happy to see many customers coming to our booth to communicate. In the future, we will participate in the exhibition with better solutions.

Will 2025 China energy storage industry pioneer award winners be included in this book?

2025 China Energy Storage Industry Pioneer Award winners have the opportunity to be included in this book. Please contact us for details.

Why should you attend the electric power exhibition?

Over 30 years successful track record and experience, it has become the largest and the most reputable electric power exhibition and has been widely recognized by global market leaders and international trade associations.

Why is energy storage important?

Energy storage plays a vital role and serves as a key technology in renewable energy systems. It is essential for enabling the widespread adoption of distributed energy and microgrids, supporting energy interconnection and sharing, and achieving integration with the power grid.
