Abstract—With ever-increasing oil prices and concerns for the natural environment, there is a fast-growing interest in electric vehicles (EVs) and renewable energy resources (RERs), and they play an important role in a gradual transition. However, energy storage is the weak point of EVs that delays. Which energy storage sources are used in electric vehicles?

Electric vehicles (EVs) require high-performance ESSs that are reliable with high specific energy to provide long driving range . The main energy storage sources that are implemented in EVs include electrochemical, chemical, electrical, mechanical, and hybrid ESSs, either singly or in conjunction with one another.

Do electric vehicles need a storage capacity system?

Currently, the world experiences a significant growth in the numbers of electric vehicles with large batteries. A fleet of electric vehicles is equivalent to an efficient storage capacity system to supplement the energy storage system of the electricity grid.

Which energy storage systems are suitable for electric mobility?

A number of scholarly articles of superior quality have been published recently, addressing various energy storage systems for electric mobility including lithium-ion battery, FC, flywheel, lithium-sulfur battery, compressed air storage, hybridization of battery with SCs and FC , , , , , , , .

What are energy storage technologies for EVs?

Energy storage technologies for EVs are critical to determining vehicle efficiency, range, and performance. There are 3 major energy storage systems for EVs: lithium-ion batteries, SCs, and FCs. Different energy production methods have been distinguished on the basis of advantages, limitations, capabilities, and energy consumption.

How much storage does an EV provide?

EVs potentially may provide 1-2% of the needed storage capacity. A 1% of storage in EVs significantly reduces the dissipated energy by 38%. A 1% storage in EVs reduces the total needed storage capacity by 50%. Improving by 1% the storage efficiency reduces by 0.92 TWh the needed storage.
