Developments will address grid reliability, long duration energy storage, and storage manufacturing The Department of Energy's (DOE) Office of Electricity (OE) is pioneering innovations to advance a 21st century electric grid. A key component of that is the development, deployment, and utilization.

The U.S. Department of Energy (DOE) today announced up to \$325 million for 15 projects across 17 states and one tribal nation to accelerate the development of long-duration energy storage (LDES) technologies. Funded by President Biden's Bipartisan Infrastructure Law, these demonstration projects.

This letter is intended to inform all stakeholders that the U.S. Environmental Protection Agency (EPA) intends to continue its efforts towards the development of an ENERGY STAR® specification for enterprise data storage equipment. Following is an outline of EPA's general goals and next steps.

The US Department of Energy (DOE) has released its draft Energy Storage Strategy and Roadmap (SRM), a plan providing strategic direction and opportunities to optimise DOE's energy storage investments ahead of the incoming Trump administration. The president-elect has selected oil industry executive.

PORTLAND, Ore., June 27, 2024 /PRNewswire/ -- The American Clean Power Association (ACP) today announced an important policy effort to promote the current best-in-class safety measures for energy storage technology systems. This includes policy recommendations for local and state governments to use. What is the EPRI energy storage roadmap?

Since its inception, the EPRI Energy Storage Roadmap was intended to guide the direction of EPRI's energy storage efforts to ensure delivery of relevant and impactful resources to its Members, the industry, and the public. The following table maps EPRI's energy storage related publications to the relevant Future State.

Is EPRI re-vising the future of energy storage?

Now in 2024, EPRI and its Member Advisors are re-VISION-ing the desired future of energy storage with the development of the Energy Storage Roadmap 2030.

Will the DOE inform its energy storage SRM through a notice of Availability (NOA)?

The DOE is asking for comment from stakeholders to inform its energy storage SRM through a formal Notice of Availability (NOA). The Energy Storage Summit Central Eastern Europe is set to return in September 2025 for its third edition, focusing on regional markets and the unique opportunities they present.

Will US energy storage industry invest \$100 billion in batteries?

Courtesy of Salt River Project The U.S. energy storage industry will invest \$100 billion over the next five years to build and buy batteries made in the United States, the American Clean Power Association and company representatives said Tuesday.

What does ACP's \$100 billion commitment to domestic energy storage look like?

The industry's \$100 billion commitment to support domestic energy storage production "demonstrate [s] what success can look like," ACP CEO Jason Grumet said in the briefing. Right now, he added, many industry players are in a holding pattern until more clarity develops around tax and trade policy.
