

# Expected ROI of household energy storage project in Singapore 2026

## Overview

---

How will a 200MW energy storage system work on Jurong Island?

The 200MW system is currently being installed across two sites on Jurong Island – Banyan and Sakra – spanning 2ha of land in total, which is equivalent to the size of four football fields. Energy storage systems can also quickly manage mismatches in electricity supply and demand to help stabilise the power grid.

When will Southeast Asia's largest energy storage system be up?

The Republic will achieve its target of having “giant batteries” to store at least 200MW of energy three years early, when Southeast Asia’s largest energy storage system on Jurong Island is up and running by November.

How much electricity will Singapore generate in 2025?

Electricity generation in Singapore's Energy market is anticipated to reach 61.35bn kWh in 2025. An annual growth rate of 1.61% is expected during the period from 2025 to 2029 (CAGR 2025-2029). Overall emission intensity in Singapore is projected to be 471.75gCO<sub>2</sub>/kWh in 2025.

Will Singapore's deep geothermal resource potential be tapped by 2026?

In April 2024, EMA awarded a contract to a consortium, led by Surbana Jurong Infrastructure Pte. Ltd., to conduct a geophysical study assessing Singapore’s deep geothermal resource potential. Scheduled to be completed by 2026, positive results could lead to applications in power generation, cooling, and direct heating.

What is the emission intensity in Singapore in 2025?

Overall emission intensity in Singapore is projected to be 471.75gCO<sub>2</sub>/kWh in 2025. Singapore is increasingly positioning itself as a regional hub for renewable energy investment, reflecting its commitment to sustainable development and green financing initiatives.

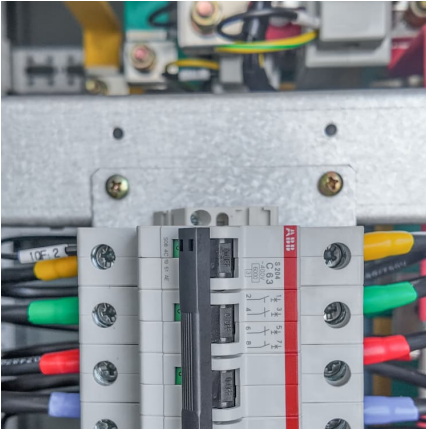

How will EMA support Singapore's transition to a more resilient energy system?

Since the announcement of a two-year regulatory sandbox for the DR and IL programmes in October 2022, our demand-responsive load has increased 1.5 times, and is over 100 megawatts now. EMA will continue to engage the industry to attract new participants, supporting Singapore's transition to a more resilient energy system.

## Expected ROI of household energy storage project in Singapore 202
