

# Expected ROI of hybrid renewable storage project in Malaysia 2025

## Overview

---

Does a hybrid energy storage system have an environmental impact?

In this study, an assessment of the environmental impact was considered in the analysis of the proposed hybrid energy storage system for EVCS. This examination aimed to quantify both the total CO<sub>2</sub> emissions from the grid and the Renewable Fraction (RF) of the system components.

What is hybrid energy storage?

The hybrid energy storage configuration offers a long-term energy storage solution, surpassing current batteries' capabilities while providing a stable electricity supply for a sustainable EVCS system.

Can Malaysia raise re's share of power generation mix by 2025?

To closer replicate the scenario design with the actual situation in Malaysia, the simulation period is up to 2025 of the country's national energy policy time frame (2022–2040) for raising RE's share of the power generation mix to 31 % by 2025 . Table 6. Contents of simulations and scenarios.

Are hybrid energy storage systems suitable for EVCs?

Research alignment This study introduces a hybrid energy storage system comprising H<sub>2</sub> and Li-ion batteries for EVCS to ensure resilient and stable renewable energy generation.

Which energy transition projects will be developed next year?

In addition, the hybrid hydro-floating solar photovoltaic project and green hydrogen hub at the Sultan Mahmud Kenyir power station will also be developed next year. “In terms of enabler aspect, the National Energy Transition Roadmap (NETR) has identified blended financing for funding the energy transition projects.

Which projects under Netr are launching a green hydrogen hub in

Terengganu?

Projects under the NETR have now entered the implementation phase, including the Kenyir Hybrid Hydro-Floating Solar Farm project with a generation capacity of 1,000 megawatts (MW). Half of that capacity will be dedicated to the first green hydrogen hub in Terengganu through a collaboration between PETRONAS and Tenaga Nasional Berhad (TNB).

## Expected ROI of hybrid renewable storage project in Malaysia 2025
