

Expected ROI of rooftop solar storage project in Romania 2026

Overview

How much will Romania spend on solar PV in 2024?

For rooftop PV, the budget for 2024 was 400 million EUR, and included, for the first time, storage. Through the updated National Energy and Climate Plan, Romania committed to reaching an installed capacity of 10 GW in solar PV, out of which 6,4 GW in utility-scale projects and 3,5 GW in prosumers.

Which Romanian companies are adding Bess to their renewable assets?

Other Romania-based companies, such as Parapet and Waldevar Energy, have told pv magazine that adding BESS to their renewable assets is a top priority. The May edition of pv magazine features an in-depth look at Romania's solar and energy storage markets.

How much solar energy does Romania need?

In the context of the European ambitions, Romania would need to aim for 44.4% RES, meaning 11.1 GW of solar - 6.1 GW for utility-scale and 5 GW for rooftop PV1. Drivers for solar growth The last two years have been marked by significant legislative changes that underpinned the development of the Romanian PV sector.

Is Romania a good country for solar energy?

National targets for solar PV With an average of 1,900 to 2,400 annual sunlight hours, Romania has significant natural potential for solar PV development. Yet, the country has not set ambitious targets for renewable energy sources, aiming for only 30.7% of its final energy consumption to come from RES by 2030.

How to develop a solar farm in Romania?

Under the Romanian law, the following permits, approval, certificates, authorisations are required for the development and operation of a solar farm having more than 1 MW installed capacity. The first step in developing a solar

plant project in Romania is to secure a title over the land.

Why should Romania Invest in solar power?

According to SolarPower Europe, the photovoltaic sector alone is projected to generate approximately 80,000 full-time jobs by 2030, positioning Romania among the top seven countries in this segment. Hence, it is necessary to invest in vocational training, encourage research and development, and support the skilling and reskilling programs.
