

# Expected ROI of wind solar storage project in Australia 2026

## Overview

---

How much will Australia spend on solar construction in FY2025?

Spending on solar construction is expected to peak in FY2025 at \$2.7 billion, followed by a slight decline that will average out to about \$2.5 billion annually in the five years to FY2032, on the back of anticipated builds such as the \$5.6 billion Australian Renewable Energy Hub in Western Australia.

Why is Envision Energy partnering with era Australia?

"Partnering with Envision Energy marks an exciting milestone in our pursuit of large-scale renewable projects in Australia. Integrating wind power and energy storage in a hybrid project, will constitute an excellent model for future initiatives," added Sebastiano Falesi, head of FERA Australia.

How much will Australia invest in wind infrastructure?

Macromonitor forecasts the bulk of investment will account for 50% in wind infrastructure. Macromonitor economist and report author Abdul Hannan said the additional \$10 billion of real increase in renewables work over the next three years will far outstrip any other segment of building and construction in Australia.

How important is wind & solar in construction?

Investment in wind and solar energy projects take up a large proportion of renewable construction activity in the country's overall construction portfolio, the report says. "The solar sector's total value of work done will hit its highest point of \$3.6 billion in 2024," Mr Hannan said.

What is the average lead-time for a solar project in Australia?

For Australia, our estimates show that on average 65%–85% of the total lead-times for wind projects were the pre-construction lead-time. For solar projects, the pre-construction average lead-time was 50%–83% of the total. The approvals process must be completed prior to the commencement of

construction.

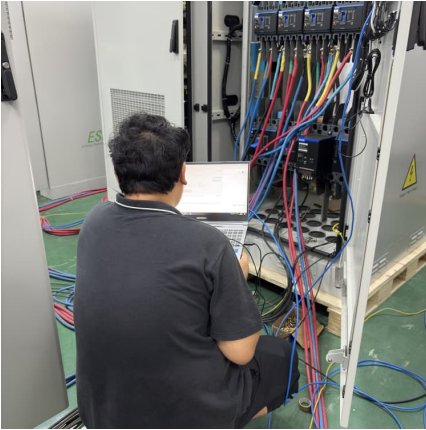

How long does a solar project take in Australia?

Australia has had a notable improvement in lead-times. Solar projects that commenced before 2010 had an average lead-time of 83 months (min: 63, max: 102). This decreased to 41 months for solar projects (min: 19, max: 75) that commenced after 2016. Onshore wind projects took longer to develop.

## Expected ROI of wind solar storage project in Australia 2026

---

### **Australia: 1.4GW of solar PV and wind committed to in Q3 2024**

Australia's Clean Energy Council has found that over 1.4GW of large-scale renewable energy generation projects were committed to in Q3 2024.

### [Solar & Storage Live Queensland 2026 , Brisbane](#)

Queensland is leading Australia's renewable energy transition, with the highest rooftop solar penetration in the country (42% of homes), a legislated 80% renewables target by 2035. Queensland is also set for massive growth in ...

### **Acen secures IPC approval for 1.2 GW solar and battery project**

Acen Australia's plan to develop a 600 MW solar farm and 600 MW / 1,200 MWh battery energy storage system in central west New South Wales has received a major boost ...

### [The Future of Solar Energy in Australia: Trends for 2025](#)

Discover key solar energy trends for 2025 in Australia, including panel efficiency, battery adoption, large-scale solar farms, and rooftop

solar growth.

### Battery storage profitability looking up in Australia, driven by ...

Investments in battery storage within Australia's National Electricity Market (NEM) are increasingly profitable due to higher power price volatility and changing market ...

### [Top 10: Wind Energy Projects , Energy Magazine](#)

In October 2024, OX2 acquired its first onshore wind power project in Australia located a few hours north of Perth. The planned total capacity to be installed is 1 GW and the project will include a 100 MW battery energy ...

### [Enel Green Power secures finance for NSW solar and ...](#)

The Quorn Park Hybrid Project, that will comprise an 80 MW solar farm and two-hour battery energy storage system, is expected to commence full operations in early 2026 with developer Enel Green Power Australia ...

### [10 Biggest Upcoming Renewable Energy Projects In...](#)

As many as 200,000 households are expected to be powered directly from the Ceres project. 10. Port Augusta Renewable Energy Park Cost: \$1bn (approx.) , Location: South Australia Another integrated wind and solar ...

### [5 Ways Battery Storage Is Transforming Solar Energy ...](#)

Over 140 giant battery projects above 1 GWh each are already planned through 2026, dozens of which are multi-gigawatt-hour endeavors linked with renewable generation . This fast-growing marriage of solar and storage is ...

### **ACEN Australia's 900 MW Robbins Island wind project secures ...**

ACEN Australia is the platform representing ACEN's renewable energy assets in Australia. With more than 1 GW capacity of large-scale renewable energy generation in ...

### **Chinese PV Industry Brief: Huaneng, TBEA announce GW-scale ...**

The solar plant is expected to be completed by the end of 2025, while the wind project is scheduled for completion by the end of 2026.

### [Largest solar farm in Victoria begins construction](#)

Engie has broken ground on its 250 MW Goorambat East solar farm, with Victorian minister for climate action, energy and resources, Lily D'Ambrosio, attending the ...

### **Surge in solar, wind and battery investment sets pace ...**

The politics remains shaky, but strong investment in solar, wind and energy storage in the final quarter of 2024 has put Australia back on track for renewables target.

### **Solar projects forecast to drive \$5.4 billion construction boom to 2026**

A Sydney-headquartered industry research and forecasting company Macromonitor report has forecast investment in solar will rise 70% over the coming two years ...

### [10 large solar projects in development for 2024](#)

FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

### [Clean Energy Council reports , Clean Energy Council](#)

A market-sounding report commissioned by the Clean Energy Council and Energy Networks Australia highlights the critical need to solve transmission challenges to ...

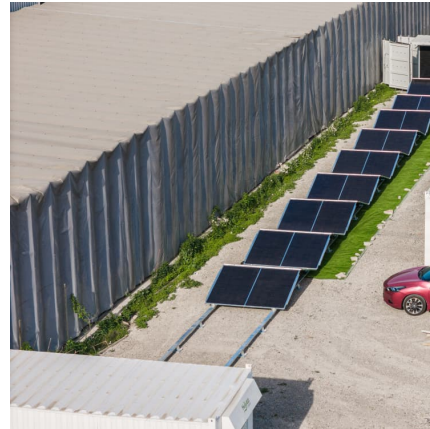

### [Acen secures IPC approval for 1.2 GW solar and ...](#)

Acen Australia's plan to develop a 600 MW solar farm and 600 MW / 1,200 MWh battery energy storage system in central west New South Wales has received a major boost with the state's Independent Planning Commission ...

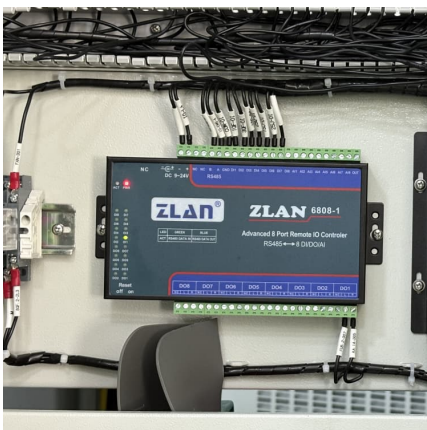

### [Global Market Outlook For Solar Power 2023](#)

The annual Global Market Outlook for Solar Power is a project that comes to life with the support and in-depth knowledge of the world's major regional and local solar industry associations. ...

### Project Finance Brief: Enfinity Global Secures \$368 Million

1 ??· The \$500 million Kelso solar project is currently under construction. Akaysha Energy, an energy storage project developer, secured a A\$300 million (~\$196 million) corporate debt ...

### [19 Australian renewables projects add 6.4GW to ...](#)

The projects include solar, wind and hybrid technologies, with 40% incorporating battery storage to ensure energy reliability. Credit: Nordic Studio/Shutterstock. Australia's renewable energy sector is set for significant ...

### A break down of new wind and solar projects: When will they ...

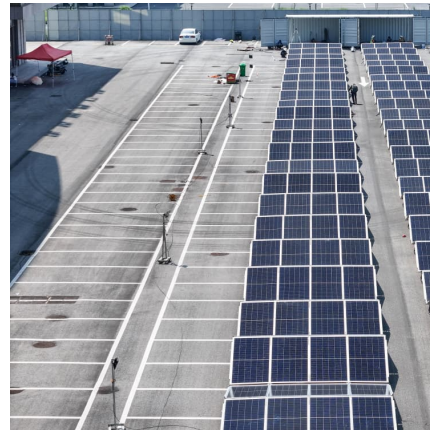

In this note I look at the reasonably foreseeable wind and solar projects being built across Australia's main grid and estimate their production over the next few years.

### Australia's biggest battery storage tender poised for take-off as

Australia's next storage tender - the country's biggest - will have key design changes, but still will not include VPPs or demand response.

### Huge solar farm and battery project lands federal approval

A 600 MW solar farm and battery energy storage system of up to 600 MW / 1,200 MWh has been given the green light by the federal government to go ahead in central west ...

### [Solar and battery storage surges ahead of wind](#)

In this new energy mix, combined solar and battery projects are taking the lead over utility-scale wind generation. Construction and transmission costs for new wind farms are rising.

### [US total solar capacity to reach 182 GW by end of 2026](#)

The US Energy Information Administration (EIA) says cumulative solar installations are expected to double from 91 GW to 182 GW from the end of 2023 to the end of 2026. Meanwhile, battery energy

### Renewable energy projects predicted to drive

Spending on building renewable energy infrastructure is forecast to peak at \$20 billion in 2026, stimulated by the Australian government's target of 82% electricity from renewables by 2030, but caution remains over workforce ...

### Solar projects forecast to drive \$5.4 billion ...

A Sydney-headquartered industry research and forecasting company Macromonitor report has forecast investment in solar will rise 70% over the coming two years to \$5.4 billion but overall renewable energy generation ...

### Role of BESS in Achieving 82% Renewables in ...

The volume of large-scale BESS under construction in Australia passed that of solar and wind projects combined in 2023 and the trend has intensified this year, with batteries attracting federal support.

### Solar, battery storage to lead new U.S. generating capacity ...

Together, solar and battery storage account for 81% of the expected total capacity additions, with solar making up over 50% of the increase. Solar. In 2024, generators ...

### EDP expands presence into Australia

Acquisition of local company enables development of wind, solar and storage energy projects. Australian market represents one of the greatest potentials in Asia-Pacific, a region where EDP Renováveis entered in 2022.

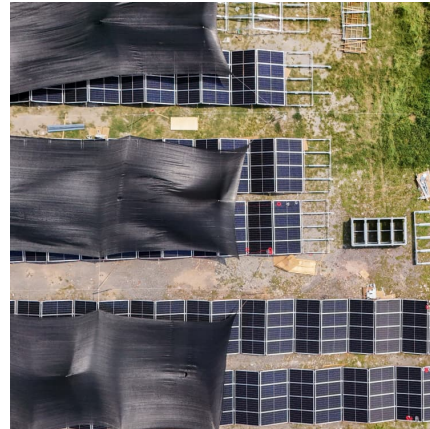

### [19 projects announced in Australia's biggest ...](#)

South Australia: 2 projects producing 574MW  
Queensland: 3 projects producing 550MW (plus 1,200MWh of storage). These projects use a mix of solar, wind, and hybrid technologies--renewables combined with battery ...

### [Wind, solar, hydrogen hubs lead the way as ...](#)

Investment in wind and solar energy projects take up a large proportion of renewable construction activity in the country's overall construction portfolio, the report says.

### **Someva, AGL propose 'Pottinger' wind-solar-battery storage project ...**

Although the project's capacity is dominated by wind and solar power, which is a significant development for the Australia's renewable transition push and New South Wales's ...
