

Factory solar storage project financing options in Panama 2025

Overview

Panama's grid expansion, managed by the Electric Transmission Company (ETESA), is reviewed annually to integrate new generation capacity effectively. The country is preparing short- and long-term tenders for energy procurement, with studies underway to allocate solar quotas in future auctions.

Panama's grid expansion, managed by the Electric Transmission Company (ETESA), is reviewed annually to integrate new generation capacity effectively. The country is preparing short- and long-term tenders for energy procurement, with studies underway to allocate solar quotas in future auctions.

To encourage private investment in solar projects, Panama offers regulatory support and tax incentives. Urriola highlighted Law 45 of 2004, which exempts tariffs on solar equipment and provides income tax benefits, and Law 37 of 2013, updated in 2023, allowing accelerated depreciation and tax.

Incentives available for solar projects in Panama at present include an exemption from import tax, as well as the ITMBS (VAT) for the import or local purchases of equipment, parts or materials necessary for the construction, maintenance and operation of solar projects. Projects can also receive a.

Winning bidders will need to have projects operational by 1 September 2026, for existing renewable projects and new solar PV plants. Offtake agreements will be completed depending on three different schemes based on power for new or existing renewable projects supported with energy storage, energy.

Factory solar storage project financing options in Panama 2025
