## Overview

---

The Montezooma's Revenge roller coaster at Knott's Berry Farm was the first flywheel-launched roller coaster in the world and is the last ride of its kind still operating in the United States. Overview Flywheel energy storage (FES) works by accelerating a rotor ( ) to a very high speed and maintaining the energy in the system as . When energy is extracted from the system, the flywheel's rotatio.

A typical system consists of a flywheel supported by connected to a . The flywheel and sometimes motor-generator may be enclosed in a to reduce friction an.
