

Ganfeng lithium energy storage investment company

Overview

Ganfeng Lithium Co., Ltd. is a company that produces , lithium products, other metals, and in and globally. It was founded by Li Liangbin in 2000 and is headquartered in , . It is the largest producer in China and the third largest in the world, as well as the second largest lithium processor in the world (after the Chilean

What is ganfeng lithium?

As the world's leading lithium eco-enterprise, Ganfeng Lithium's business segments cover from upstream 'lithium resource development', midstream 'lithium refinery and lithium metal smelting', to downstream 'lithium battery manufacturing and battery recycling'.

What does ganfeng sell?

Described as a "lithium supermarket", Ganfeng sells a wide variety of lithium and related products, including lithium salts, other metals, and batteries. Its lithium salt production capacity was estimated at 120,000 tons per year as of 2021.

Where are ganfeng's lithium resources located?

Ganfeng's lithium resources are located in several countries and regions worldwide, and we have advanced technologies for 'lithium extraction from brine', 'lithium extraction from ore', and 'lithium recycling'. Our production capacity of lithium compounds and lithium metals is among the highest in the world.

When did Dongfeng start working with ganfeng lithium?

Dongfeng started setting up its solid-state battery project in 2018 and began working with Ganfeng Lithium on the development of first-generation solid-state battery systems in July 2019. In June 2021, Dongfeng signed a strategic partnership agreement with Ganfeng Lithium to create a solid-state battery demonstration operation project.

What is ganfeng lithium production capacity?

Ganfeng Lithium currently has a production capacity of 0.3 GWh for solid-state batteries up and running. It plans to continue ramping up production in the future.

What is ganfeng lithium doing in Xinyu?

Ganfeng Lithium is involved in the Xinyu project, which includes a new 10 GWh per year lithium battery project. This project consists of a lithium iron phosphate square hard shell cell production line, a soft pack cell production line, and a solid-state battery production line.
