Is a solar inverter a good alternative to power holding company of Nigeria?

In a country like Nigeria where electricity supply is less than adequate and the weather doesn't help matters either, a solar inverter is more than necessary. It is not just a great alternative to the Power Holding Company of Nigeria, it is actually a better and cheaper alternative considering the circumstances.

How will solar inverters change the world?

With calls for a shift towards cleaner, greener energy, it is expected that usage of solar inverters will increase tremendously in the coming years. Usually, solar inverters are powered by heavy-duty batteries (usually the types used to power trucks), charged by solar energy.

Is Nigeria's electricity problem worsening over time?

In fact, many believe the situation has worsened over time. Presently, the average Nigerian home does not get more than six hours of electricity from the DISCOs on a daily basis. It is this appalling situation that has led many Nigerians to seek alternatives to what is supplied by the national grid.

How do solar inverters work?

Usually, solar inverters are powered by heavy-duty batteries (usually the types used to power trucks), charged by solar energy. But this powering up

usually begins from the panels that receive the solar energy from the sun. They now convert and transfer such energy into a form that can be received by batteries.
