

Government procurement price of container energy storage in Greece

Overview

The regulator said the auction was highly competitive, leading to an average tender price of €47,680 (\$51,506)/MW per year. Greece's energy storage auction program awards contracts-for-difference (CfD) over periods of 10 years.

The regulator said the auction was highly competitive, leading to an average tender price of €47,680 (\$51,506)/MW per year. Greece's energy storage auction program awards contracts-for-difference (CfD) over periods of 10 years.

The Greek authorities have awarded 300 MW of new battery storage capacity in the nation's second energy storage tender, split among 11 projects. The tender is part of the country's 1 GW energy storage auction program. The Greek energy regulator has awarded 300 MW of new battery storage capacity in.

The starting price for the first tender for battery energy storage projects is set at €115,000 per megawatt per year (€/MW/year). In other words, in order to claim the granting of investment and operating aid, investors should submit offers that will move below the specific amount. The owners of.

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW.

The Greek government has opened for applications a programme that will subsidise businesses to install energy storage systems, either as part of new solar projects or as an addition to existing plants. Battery energy storage systems (BESS) License: CC0 1.0 Universal (CC0 1.0) Public Domain.

Greece's government procurement market, worth approximately €30 billion annually, is undergoing a digital facelift. Driven by EU directives and economic recovery plans, reforms aim for efficiency and transparency. The 2021 modernization law streamlined procedures, and the "promitheus.gov.gr".

While 12 projects won awards in the first tranche of Greece's recent grid-scale energy storage auctions, what of the c.500 totalling nearly 27GW that didn't?

Jon Ferris, LCP Delta's Head of Flexibility and Storage, looks at the dynamics which could play out in rounds two and three in Europe's. How often should energy storage projects be completed in Greece?

Investors will be expected to submit progress reports every three months to ensure timely construction. Greece's first energy storage tender took place last year. It awarded 12 energy storage projects, or 411,79 MW of capacity, with an average price of €49,748/MW per year.

How much does an energy storage auction cost in Greece?

The regulator said the auction was highly competitive, leading to an average tender price of €47,680 (\$51,506)/MW per year. Greece's energy storage auction program awards contracts-for-difference (CfD) over periods of 10 years. The submitted bids were capped at €115,000/MW per year, with the lowest successful bid set at €44,100/MW per year.

How many MW of new battery storage capacity does Greece have?

The Greek energy regulator has awarded 300 MW of new battery storage capacity in the nation's second energy storage tender, split among 11 projects. The tender is part of the country's 1 GW energy storage auction program. The projects range in size from 8,875 MW/17,75 MWh to 49,9 MW/100 MWh).

What is the highest subsidy for a battery project in Greece?

The highest awarded subsidy came at €58773/MW/year and refers to a 7.9 MW/31.6 MWh project located in the same region. Greek firm Hellenic Renewables, which is a subsidiary of Helleniq Energy, offered the lowest successful bids for two battery projects of 25 MW/100 MWh each.

What are the different types of Greece government procurement?

The most popular categories for Greece government procurement are - Greece Government releases various kinds of tenders - Greece RFP - A document outlining the Greece government's requirements for a proposed project or service, inviting vendors to submit detailed proposals.

What is the long-term business case for storage in Greece?

The long term business case for storage will be supported by increasing interconnection, opening ancillary services and Greece's accession to the market coupling platforms, but until then, public funding is required to kickstart investment. Funding was first announced in 2021 as part of the National Recovery and Resilience Plan.
