

Government procurement price of floor standing battery in China

Overview

The average bid stood at CNY 0.473/Wh (\$65/kWh). Public procurements in China continue to demonstrate exceptionally low price levels for lithium-ion phosphate (LFP) battery energy storage systems (BESS).

The average bid stood at CNY 0.473/Wh (\$65/kWh). Public procurements in China continue to demonstrate exceptionally low price levels for lithium-ion phosphate (LFP) battery energy storage systems (BESS).

The average bid stood at CNY 0.473/Wh (\$65/kWh). Public procurements in China continue to demonstrate exceptionally low price levels for lithium-ion phosphate (LFP) battery energy storage systems (BESS). In the latest tender, more than 80% of bidders quoted prices below CNY 0.5/Wh (\$69/kWh).

The Power Construction Corporation of China drew 76 bidders for its tender of 16 GWh of lithium iron phosphate (LFP) battery energy storage systems (BESS), according to reports. Bids averaged \$66.3/kWh, with 60 bids under \$68.4/kWh. The tender, covering supply, system design, installation guidance.

China Energy Engineering Corporation's (CEEC) auction for 25 GWh of lithium-iron-phosphate (LFP) battery systems resulted in a record-low quoted tariff of CNY 0.37/Wh (~\$0.051), a 30% year-over-year decrease from 2024. The tender was structured into three packages based on system duration and.

On July 1, China Electric Equipment announced a landmark centralized procurement for energy storage batteries and energy storage PCS (Power Conversion Systems). This massive procurement includes 14.54 GWh of energy storage batteries and 11.652 GW of PCS bare machines. Additionally, the procurement.

The global energy storage market is projected to grow at 20% CAGR (2025-2030), with China as the primary driver. Key trends include: Solar and wind farms require large-scale battery storage for grid stability. Government policies (e.g., China's "Dual Carbon" goal) accelerate adoption. Factories and.

Based on recent data, prices for battery energy storage systems (BESS) fluctuate between USD 59-132/kWh, depending on the type of technology and discharge rate (C-rate). Purchasers can optimize costs by selecting the right product for their project needs. The Chinese government has set a clear goal.
