Finland's renewable energy market is flourishing, with renewables accounting for over 43% of the country's total electricity generation in 2022. This is projected to reach 51% by 2030, driven by strong government support, declining costs of renewable energy technologies, and growing consumer demand.

The Competence Centre for Sustainable and Innovative Public Procurement in Finland (KEINO) has surveyed the procurement situation in Finland from three different perspectives: innovativeness and sustainability in public procurements in Finland. The surveys provide valuable insight into the public.

In addition to the price of solar panels and inverters, the installation environment has a significant impact on the cost of the project. The surroundings and the terrain will determine how the panels are installed and the number of labour hours required. Grid connection is also an important cost.
