

Government procurement price of photovoltaic ESS in Philippines

Overview

The Philippines' Energy Regulatory Commission (ERC) has published the ceiling prices for its upcoming 2GW auction for large-scale renewables. The cap price for PV technology was set at PHP3.628 (\$0.069)/kWh, while that for wind power was assigned a ceiling rate of PHP5.2887.

The Philippines' Energy Regulatory Commission (ERC) has published the ceiling prices for its upcoming 2GW auction for large-scale renewables. The cap price for PV technology was set at PHP3.628 (\$0.069)/kWh, while that for wind power was assigned a ceiling rate of PHP5.2887.

The ceiling price for PV was the lowest among the four renewable energy technologies eligible to compete in the procurement exercise. The 200 MW Tarlac plant is the largest PV project in the Philippines. Image: Solar Philippines The Philippines' Energy Regulatory Commission (ERC) has published the.

The Department of Energy (DOE) has officially released the Terms of Reference (TOR) for the fourth round of the Green Energy Auction (GEA-4), providing a clear framework for the auction process. The TOR sets out the technical, financial, and commercial requirements that will govern project.

The Philippine government has officially launched the fourth round of its Green Energy Auction (GEA-4), announced today by the Department of Energy (DOE). This auction introduces a groundbreaking feature: the integration of solar power plants with Battery Energy Storage Systems (BESS), marking a.

The Philippines' government will tender for 9,378MW of renewables, comprising distributed and large-scale solar PV, including ground-mount, rooftop and floating PV, alongside onshore wind capacity. Bids will also be invited for 1,100MW of solar projects that feature an energy storage component.

Pairing solar plants with battery energy storage systems (BESS) will be the main strategic focus for the country's upcoming renewable energy auction. Each project must have a minimum storage duration of four hours to ensure

sufficient grid support and energy reliability. In July 2024, the.
