

# Government procurement price of renewable energy storage in Italy

## Overview

---

MACSE will promote the development of new storage capacity, which is functional for effective integration of renewable sources into the system, also in order to reduce and manage overgeneration.

MACSE will promote the development of new storage capacity, which is functional for effective integration of renewable sources into the system, also in order to reduce and manage overgeneration.

The non-programmable nature of the two most widespread types of renewable energy sources, solar and wind, has increased the need to implement the construction of energy storage systems, which can absorb energy in excess, produced during periods of low demand, and release it into the grid during.

The Electricity Storage Capacity Procurement Mechanism (in Italian “Meccanismo di Approvvigionamento di Capacità di Stoccaggio Elettrico”: MACSE) is a regulatory initiative aimed at fostering the growth of electricity storage capacity in Italy. This growth is crucial to accommodate the increasing.

Legislative Decree 210/21 introduced a new mechanism for the procurement of electricity storage capacity (“MACSE”), developed with the aim of integrating renewable energy sources with an efficient level of overgeneration (i.e., when electricity production exceeds demand), based on planned grid.

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling €17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and.

The European Commission has approved, under EU State aid rules a €17.7 billion Italian scheme to support the construction and operation of a centralised electricity storage system. The measure contributes to the achievement of the objectives of the European Green Deal and 'Fit for 55' package, by.

Rome, April 2025 – In a bold move to meet its EU-mandated greenhouse gas emissions targets, Italy is accelerating its renewable energy strategy under the Integrated National Energy and Climate Plan (PNIEC Italy). The government has set ambitious goals for increasing renewable energy on the national.
