

# **Government procurement price of wind solar storage in Australia**

## Overview

---

The federal government has flagged four new wind, solar and storage tenders this year as it seeks to speed up the process to help ensure it meets its 2030 target.

The federal government has flagged four new wind, solar and storage tenders this year as it seeks to speed up the process to help ensure it meets its 2030 target.

The Australian federal government says it plans to launch four new big tenders for wind, solar and storage in coming months as it works to ensure that enough capacity is delivered into the country's main grids to meet its 2030 renewable energy target. The four new tenders were revealed late.

The federal government has announced it will double the amount of storage projects being sought in the next round of tenders for its Capacity Investment Scheme, upping it from 2 GW / 8 GWh to 4 GW / 16 GWh. The solar and wind tenders have also been increased, moving from 4 GW to 6 GW. Federal.

The Capacity Investment Scheme (CIS) is a key policy mechanism being deployed by the federal government to encourage new investment in wind, solar and battery storage through a competitive tender process every six months. On 10 May 2024, the federal government released the largest ever single.

Users can register free of cost and get unlimited access to not only Renewable Energy govt Tenders, e procurement and EOI ( Expression of Interest), but other Public Tender of similar products like: Biomass Energy Bids, Biomass Energy Consultancy, Biomass Energy Project, Biomass Energy RFP, Biomass.

Australia's energy minister Chris Bowen revealed today (21 October) that the federal government is seeking 10GW of capacity from energy storage, wind, and solar PV in the next Capital Investment Scheme (CIS) tender round. The next tender round, which is set to be conducted in the coming months.

The Australian government will supercharge its program of underwriting

renewable energy generation and clean dispatchable generation capacity by significantly expanding the next auction in its flagship Capacity Investment Scheme (CIS) policy. Federal Energy Minister Chris Bowen has announced that. How many GW of energy will Australia's CIS tender entail?

This is an increase on the previous CIS tender, which sought 6GW in total. Image: The Northern Territory government. Australia's energy minister Chris Bowen revealed today (21 October) that the federal government is seeking 10GW of capacity from energy storage, wind, and solar PV in the next Capital Investment Scheme (CIS) tender round.

How many new wind & solar tenders are there this year?

The federal government has flagged four new wind, solar and storage tenders this year as it seeks to speed up the process to help ensure it meets its 2030 target.

How many energy storage projects are there in Australia?

Recent successful tenders have seen six energy storage projects provided support, totalling 3,626MWh, in Victoria and South Australia. Meanwhile, Western Australia opened its first CIS tender on 22 July, aiming to secure 2GW of clean, dispatchable capacity across the Wholesale Electricity Market (WEM).

Where can I find a new CIS tender for 6 GW wind & solar?

You can find him on LinkedIn and on Twitter. New tender for 6 GW for wind and solar opens, as Climate Authority calls for CIS to be expanded, for more use of local networks, faster planning approvals and more solar and battery hybrids.

What is the new 6GW tender?

The new 6GW tender will be known as Tender 4 (the first 6 GW tender was Tender 1 and there are two other storage tenders also underway), and eligible projects will bid for an underwriting agreement that provides a price floor - to enable certainty and cheaper financing - and an agreement to share excess profits with the government.

How important is the 6 GW CIS tender?

In total, the CIS is seeking to incentivise the deployment of 32 GW of

renewable and storage capacity over the next few years, so this 6 GW tender is significant (19% of the capacity the CIS is intended to deliver will be covered in this tender).<sup>1</sup> Tender 1 is only for electricity generation in the NEM, and will be allocated as follows:

## Government procurement price of wind solar storage in Australia

---

### Australia: 2GWh of energy storage reaches financial commitment

The largest energy storage system to reach financial commitment in Q2 2024 was the 1,200MWh Stanwell Big Battery in Queensland, to be built at the Stanwell Power Station ...

### Australia's biggest storage tender kicks off to fill gaps ...

The first stage of what will amount to Australia's biggest storage tender has been formally kicked off, with registrations opening for 600MW and 2400 MWh of dispatchable capacity to be deployed in South Australia and ...

### Australia fast-tracks four big wind, solar and storage ...

The federal government has flagged four new wind, solar and storage tenders this year as it seeks to speed up the process to help ensure it meets its 2030 target.
