

# **Government procurement price of wind solar storage in Romania**

## Overview

---

The maximum strike prices are set at €80 (~\$89.72)/MWh for wind and €73 (~\$81.87)/MWh for solar projects. The first CfD auction was launched in September 2024, including 500 MW of solar and 1 GW of wind capacity.

The maximum strike prices are set at €80 (~\$89.72)/MWh for wind and €73 (~\$81.87)/MWh for solar projects. The first CfD auction was launched in September 2024, including 500 MW of solar and 1 GW of wind capacity.

The Romanian authorities have allocated 1.52 GW of renewable energy capacity in a procurement exercise, with the lowest bid for PV technology at €0.045 (\$0.047)/kWh. Romania's Ministry of Energy has revealed the results of the country's first renewable energy auction under a.

The Romanian Ministry of Energy has announced the second auction under the State Aid Scheme through contracts for difference (CfD) to increase renewable energy production from onshore wind and solar sources. The auction is for a capacity of 3,472 MW, with 2,000 MW for onshore wind and 1,472 MW for.

Wind and solar power projects with a combined capacity over 1.5 GW in Romania are eligible for subsidies under a contract-for-difference (CfD) scheme. The first round of auctions resulted with ten and eleven winning bids, respectively. The weighted average of accepted wind power prices is EUR 65.

Romania's Ministry of Energy has officially launched the country's 1st renewable energy auction, inviting bids for 1 GW onshore wind and 500 MW solar energy capacity under the contracts for difference (CfD) scheme. For wind energy, the ceiling price is capped at €82 (\$90.4)/MWh, while for solar it.

The country's renewable energy market is projected to grow at a CAGR of over 3% from 2023 to 2028, driven by factors such as government support, technological advancements, and growing public demand for clean energy. Romania boasts a diverse range of renewable energy resources, including.

Romania's Ministry of Energy announced on December 16 that it has completed the evaluation of the financial offers submitted by participants in

the first Contracts for Difference (CFD) auction in Romania, and contracts for over 1,500MW of new green energy production capacity have been awarded. Out. How much does solar cost in Romania?

Romania has opened its second renewables auction under a contracts-for-difference (CfD) scheme, offering 3.47 GW of capacity, including 1.47 GW of solar. The auction sets a maximum strike price of €73 (\$81.81)/MWh for solar energy. Romania's Ministry of Energy has announced its second renewables auction under a CfD scheme.

How much does wind power cost in Romania?

The weighted average of accepted wind power prices is EUR 65 per MWh, compared to EUR 51 per MWh for photovoltaics. Officials in Romania are hoping that the EUR 3 billion approved from the European Union's Modernisation Fund will cover the costs of the new 15-year CfD mechanism for solar and wind power.

Are wind and solar power projects eligible for subsidies in Romania?

Wind and solar power projects with a combined capacity over 1.5 GW in Romania are eligible for subsidies under a contract-for-difference (CfD) scheme. The first round of auctions resulted with ten and eleven winning bids, respectively.

Will wind farms increase power supply in Romania?

Wind farms could contribute with 13 GW to the national power generation capacity by 2020. Between 2009 and 2017, total wind farm capacity will comprise 4,000 MW with investments of US\$5.6 billion. Additionally, potential offshore wind farms may increase supply.

Are wind and solar power projects eligible for contracts for Difference (CfD)?

Be the first one to comment on this article. Wind and solar power projects in Romania of over 1.5 GW in total are eligible for contracts for difference (CfD) after the first auctions.

Will the European Union modernisation Fund cover solar and wind power costs?

Officials in Romania are hoping that the EUR 3 billion approved from the European Union's Modernisation Fund will cover the costs of the new 15-year

CfD mechanism for solar and wind power. Still, consumers will need to bear administrative and electricity transmission expenses.

## Government procurement price of wind solar storage in Romania
