And how you benefit. HIVE Solar Batteries implements cutting edge technology for the use of home solar storage solutions. The Hive 2.9kW battery is a modular solution and is capable of being expanded to 17.4kWh for even greater storage capacity.

How much does a hive solar battery cost?

Hive Solar Battery 2.9 kWh RRP \$7,499* Includes standard metropolitan installation. Additional costs may apply. Exclusive to Solar Battery Group, HIVE Solar Batteries implements cutting edge technology for the use of home solar storage solutions.

Are Hive solar batteries safe?

Hive Solar Batteries only use the safest battery chemistry available on the market - Lithium Iron Phosphate. As a safeguard, we use extra casing for our batteries and have software integration to protect the battery from any potential damage. Media error: Format (s) not supported or source (s) not found.

Is hive solar a good company?

I've been impressed with Hive Solar's performance throughout and the people working for them did their jobs brilliantly. I would recommend them to many other People considering solar for their business and home and help cut their costs ." Service for our UPS has been phenomenal and the way they handled the warranty claim was worthy.

Are Hive batteries any good?

Hive batteries are basically rebadged AlphaESS systems. They've often been offered via snail mail marketing promising really special deals that turn out to be not so special. I'm not a fan of this sort of marketing, nor AlphaESS

batteries – so I don't recommend Hive.

What is the warranty on the hive battery?

As for further details about the Hive battery, it's worth taking a look at our [Alpha-ESS reviews page](#) for more information on that company. The datasheet for Hive indicates a 5 year product warranty and 10 year performance warranty.
