Honeywell has launched its latest innovation, the Ionic Modular All-in-One battery storage system, aimed at assimilating renewable energy into the grid.

This new system has been designed to optimise energy efficiency and handle fluctuations in energy demand, ensuring reliable backup power when.

Honeywell has launched its Ionic battery energy storage system (BESS) with integrated controls and energy management. The system is designed to cut energy costs, stabilize the grid, and provide backup power. From pv magazine India Honeywell has introduced Honeywell Ionic, a compact, modular battery.
