

How much does a solar house battery cost

Overview

The average cost to install a solar battery in 2025 ranges from \$9,000 to \$19,000, with most homeowners spending about \$13,000. The total price depends mainly on the type and capacity of the battery, as well as the complexity of your system. How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

How much does a solar battery storage system cost?

The cost of a solar battery storage system for your home can range from as low as \$300 to more than \$20,000, depending on the size of your home, quality of the storage system, and energy consumption. Most systems typically cost around \$10,000 on average.

How much does it cost to install a solar battery in 2025?

The average cost to install a solar battery in 2025 is between \$9,000 and \$19,000, with the average homeowner paying around \$13,000 on average.

How much does a solar battery backup cost?

Two cabinets can connect to a single inverter for up to 36 kWh total backup power. Whole-house solar battery backup costs \$20,000 to \$32,000 installed, not including solar panels. The average home uses 28 to 30 kWh per day, requiring batteries with at least that total capacity or more to power the entire home for one day.

How much does a Tesla Solar battery cost?

Tesla's solar batteries use lithium-ion batteries, which cost around \$9,000 to \$30,000 with installation. Lithium-ion batteries are long-lasting, durable, and require little maintenance.

How much does solar installation cost?

Solar battery type and capacity are the main factors that impact project pricing, along with professional installation that costs \$1,000 to \$2,000 on average, depending on local labor rates and availability. The Modernize Mission
