

How much is solar battery cost

Overview

Most solar batteries cost between \$6,000 and \$30,000. The average cost is around \$10,000. Key factors affecting the price are battery size and type. After a 30% tax credit, the average price for a fully-installed 12.5 kWh battery is about \$13,000. Savings may vary based on your location. How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

How much does it cost to install a solar battery in 2025?

The average cost to install a solar battery in 2025 is between \$9,000 and \$19,000, with the average homeowner paying around \$13,000 on average.

How much does a Tesla Solar battery cost?

Tesla's solar batteries use lithium-ion batteries, which cost around \$9,000 to \$30,000 with installation. Lithium-ion batteries are long-lasting, durable, and require little maintenance.

Are solar batteries worth it?

Solar batteries typically cost \$10,877 after the federal tax credit—which expires for batteries installed after December 31, 2025—for the 13.5 kilowatt-hours (kWh) of storage a typical home needs to keep essential devices running during outages (also the size of a Tesla Powerwall 3). Whether they're worth it depends entirely on your situation.

How much does a solar battery storage system cost?

The cost of a solar battery storage system for your home can range from as low as \$300 to more than \$20,000, depending on the size of your home, quality of the storage system, and energy consumption. Most systems

typically cost around \$10,000 on average.

How much does a solar system cost?

Uninstalled, solar battery systems can cost anywhere from \$800 to \$10,000. The price of a solar system to power a home or appliance is generally between \$5,000 to \$7,000. You can expect to pay between \$400/kWh to \$750/kWh for the system.
