## Overview

---

Why is energy storage important in India?

The technical system characteristics of the Indian power system are favorable for energy storage to reduce operating cost and improve system reliability. Storage can provide energy arbitrage, ancillary services, and potentially defer transmission investments, but existing policy and regulatory barriers may limit these opportunities.

What are the challenges faced by India's energy storage system?

lock reliability. Current storage costs pose challenges. Grid infrastructure expansion must align with renewable capacity additions to prevent congestion. The Government of India set up a 'Round-the-Clock' tender to combine renewable energy with storage, yet implementation is pending. Introducing storage systems at various l.

How can Indian policymakers broaden the role of energy storage?

If Indian policymakers want to broaden the role of energy storage in the power system, an important first step is to include energy storage in national energy policies and programs.

Can energy storage accelerate India's energy transition?

Energy storage has the potential to meet these challenges and accelerate India's energy transition. The potential for storage to meet these needs depends on many factors, including physical characteristics of the power system and the policy and regulatory environments in which these investments would operate.

Does India need a grid-scale energy storage system?

l and other conventional power sources.Executive SummaryThe rapid expansion of renewable energy has both highlighted its deficiencies, such as intermittent supply, and the pressing need for grid-scale energy storage

systems (ESS) to facilitate India’.

What is India's energy storage demand?

According to the NEP 2023, India's storage demand is projected to reach a total capacity of 73.93 GW and an energy storage capacity of 411.4 GWh by 2031 and 2032, with 175.18 GWh from pumped storage hydropower (PSH) and 236.22 GWh from mainstream electrochemical energy storage, ensuring a stable supply of renewable energy.
