The primary focus of Orico's product line is on convenience and reliability, making it an ideal choice for camping, traveling, and outdoor activities. The detailed examination of these features underscores why this product has carved a niche in the burgeoning market of portable power systems.

Although I have an outdoor power supply with 4 AC output plugs on it, it weighs close to 25kg, and it is still a bit difficult to use in a carry-on scenario. At this time, a mobile power bank with both portability and outdoor power characteristics appeared in front of my eyes.

In the overall experience, ORICO AT150 has made a good balance in terms of fuselage size, interface, power, etc., and can well solve the outdoor power problem during short-distance travel.

In general, the 500W Orrick outdoor power supply gives me a good feeling. It not only supports the use of 220V electrical appliances, but also supports PD60W fast charging on the body.

Introducing our 150W outdoor energy storage power supply, a reliable and portable mobile power source for your camping and outdoor adventures! Equipped with high capacity batteries, this power supply unit can keep your devices charged and powered throughout the day.
