

Japan sri lanka pumped storage project

Overview

The Maha Oya Pumped Storage Power Station is a 600 MW being developed in the Aranayake and Nawalapitiya areas. Upon completion, it will be the country's first facility, and one of the largest in terms of nameplate capacity. The Maha Oya facility is designed to store excess renewable energy from solar and wind sources, thus creating supporting infrastructure for Sri Lanka's target of generating 11,000 MW of renewable energy by 2030.

This 600 MW project is designed to store surplus energy generated from solar and wind sources, enhancing grid stability and maximizing renewable energy utilization. Situated in Aranayake and Nawalapitiya, the project will consist of two reservoirs linked by a 2.5 km tunnel.
