

Japanese energy storage battery shell design

Overview

Why should Japan invest in storage batteries?

Energy Security: Storage batteries are key to stabilizing Japan's energy system. Given Japan's limited natural resources and dependence on imports, combined with its vulnerability to natural disasters, investing in reliable and sustainable energy solutions is critical.

Does Japan have a grid-scale battery market?

As Japan takes a leading role in Asia's grid-scale energy storage market, it's attracting international companies, including players like Tesla, which is known for its large-scale battery storage product, the Megapack. Japan NRG examines the latest trends in Japan's grid-scale battery market.

What is Japan's storage battery industry strategy?

The "Storage Battery Industry Strategy" document from METI sets out three key targets: **Boost Domestic Manufacturing:** Japan aims to ramp up its domestic production of automotive storage batteries to 100 GWh by 2030, with a long-term goal of reaching 150 GWh annually. This move highlights the potential for foreign companies to invest in Japan.

How big is Japan's battery storage market?

In the commercial space, Japan's battery storage market was valued at USD 593.2 million in 2023 and is projected to reach USD 4.15 billion by 2030. While commercial installations currently dominate revenues, industrial adoption is expected to scale faster. Utility-scale storage is also gaining ground.

Does Japan's energy storage rollout face structural headwinds?

Despite strong policy signals, Japan's energy storage rollout faces deep structural headwinds. The nation's split-grid architecture—50 Hz in the east and 60 Hz in the west—limits electricity transfer and complicates nationwide deployment.

Can Eku energy commercialise large-scale batteries in Japan?

For Eku Energy, the LTDA is important to the business model of its Japanese projects but the developer, perhaps best known for projects in the UK and Australia, sees three pathways to commercialisation for large-scale batteries in Japan. The company secured a 20-year tolling agreement for its first Japan project, the 30MW/120MWh Hirohara BESS.
