

Labor solar battery rebate

Overview

Labor's \$2.3 billion program applies to people with existing solar, or for those wanting to invest in a new solar-plus-battery set-up. It won't be means-tested and offers a 30 per cent discount on batteries for households, businesses and community facilities such as sports centres or.

Labor's \$2.3 billion program applies to people with existing solar, or for those wanting to invest in a new solar-plus-battery set-up. It won't be means-tested and offers a 30 per cent discount on batteries for households, businesses and community facilities such as sports centres or.

Labor's \$2.3 billion program applies to people with existing solar, or for those wanting to invest in a new solar-plus-battery set-up. It won't be means-tested and offers a 30 per cent discount on batteries for households, businesses and community facilities such as sports centres or town halls.

The rebate will work by applying a rebate of \$372 per one kilowatt-hour (kWh) of usable capacity (before admin fees and charges). So for example, a home battery with 10kWh of capacity would have a total rebate of \$3,720 (excluding admin fees and charges). ← Mobile/tablet users, scroll sideways to.

The federal government's Cheaper Home Batteries Program lowers the cost of adding a home battery to either a new or existing solar system by a maximum of \$372/kWh of useable storage. Use the calculator below to estimate how much you could save. The cost of the battery listed below is a very rough.

The program is designed to reduce the cost of installing home battery systems by 30%, starting from 1 July 2025, contingent upon Labor's re-election in the upcoming federal election on 3 May 2025. To access the rebate, the following must apply: Battery Size: System must have usable capacity between.
