

# **Large scale battery storage supplier quotation in Poland 2025**

## Overview

---

Is Poland moving towards battery energy storage systems (Bess)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

How many MW rated energy storage systems are there in Poland?

The capacity obligations for these projects ranged from 1.2 MW to 153 MW rated power, with an average capacity of around 30 MW. The decision to reduce the de-rating factor for energy storage systems in the last capacity market auction in Poland from 95 percent to 61 percent did not prove detrimental to the market.

How many Bess market units won the 2024 auction?

Even more surprising was their performance in the December 2024 auction: out of the 245 Market Units that won the main auction for the 2029 delivery year, 82 were identified as BESS.
