

Latest planning for luxembourg s energy storage industry

Overview

With a 20-point roadmap to scale electricity storage, the Grand Duchy is opening doors for innovation in grid flexibility, home energy systems, and smart infrastructure.

With a 20-point roadmap to scale electricity storage, the Grand Duchy is opening doors for innovation in grid flexibility, home energy systems, and smart infrastructure.

On Wednesday 9 July 2025, Luxembourg's Minister of the Economy, SMEs, Energy and Tourism, Lex Delles, presented the strategic roadmap for the promotion and development of electricity storage batteries in Luxembourg: "Späicherstrategie Lëtzebuerg". This strategy outlines the role of storage.

With a 20-point roadmap to scale electricity storage, the Grand Duchy is opening doors for innovation in grid flexibility, home energy systems, and smart infrastructure. The strategy, announced on 9 July, aims to maximise the added value of storage batteries for end consumers and the electricity.

Grid energy storage (also called large-scale energy storage) is a collection of methods used for energy storage on a large scale within an electrical power grid. Electrical energy is stored during times when electricity is plentiful and inexpensive (especially from intermittent power sources such.
