

# **Lead acid battery storage supplier quotation in Cyprus 2026**

## Overview

---

How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021. The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as “the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems,” adding: “During the day we waste megawatt-hours because we lack storage, and at night we are one step away from blackouts.”.

Will Supercars still use LFP batteries in 2024?

Even though the first supercar with an L (M)FP battery was commercialized in 2024, market trends suggest that vehicles that require high energy densities to maximize range will still be equipped with NMC. The speed of LFP adoption varies by region. Chinese OEMs are proceeding most rapidly.
