

Lead acid battery storage supplier quotation in Hungary 2025

Overview

Why should we invest in battery production in Hungary?

The current battery production facilities in Hungary, together with the growing number of end-of-life electric vehicles, offer good opportunities to develop innovative and sustainable recycling processes of the valuable battery materials. 6. Strengthening international co-operation.

Is a battery training programme a good idea for Hungary?

It may be beneficial for Hungary if the education and further training programmes currently being developed at EU level, covering the entire battery value chain (e.g. the ALBATTIS project)⁷, are transposed in a way that meets Hungarian conditions.

How can battery production contribute to a sustainable and circular economy?

The extraction, recycling and multiple (re)-use of raw materials for battery production will create value and business opportunities in the transition to a sustainable and circular economy. 6. Strengthening international co-operation.

Who makes SAFT Batteries?

Saft was founded in 1918 and is headquartered in France. It is a global leader in the design, development, and manufacture of industrial batteries. Since 2016, Saft has been a wholly owned subsidiary of TotalEnergies.

How many electric vehicle batteries will ACC produce in 2025?

Recent Developments: ACC aims to reach an annual production capacity of 150,000 electric vehicle batteries by 2025 and plans to scale production to 2-2.5 million electric vehicle battery equivalents by 2030, capturing around 20% of the European market share.

What is a battery raw materials oriented industry?

Battery raw materials in a sustainable and circular economy-oriented industry
Providing access to raw materials for the manufacture of batteries through mining, recycling and multiple (re)-use. Without its own production of the necessary metals and minerals, Europe will remain sensitive to changes in global trade.
