

Lead acid battery storage supplier quotation in South Africa 2030

Overview

How big is the battery storage market in South Africa?

It is analyzed that the South African battery storage market can be expected to grow from 270 MWh in 2020 to 9,700 MWh in 2030 under the base-case scenario and 15,000 MWh under the best-case scenario. In both cases, the electric vehicle (EV) sector is expected to drive the bulk of this growth.

Is the South African region a good place to invest in batteries?

The Southern African region is well endowed with most of the key battery minerals (Table 8). Clearly this could offer potential opportunities for the establishment of upstream activities and potential collaboration between African countries in the battery value chain. Table 9.

Who makes lithium ion battery cells in South Africa?

It is a Johannesburg-based family business, which has been manufacturing automotive batteries since its establishment in 1955. The estimated production volumes of the lead-acid battery producers together with imports are approximately 4 million units per annum. Lithium-ion (Li-ion) battery cells are currently not manufactured in South Africa.

Who sells Li-ion forklift batteries in South Africa?

The company has formed a strong relationship with South Africa's largest supplier of forklifts, Goscor. Goscor uses Maxwell and Spark as their sole supplier of Li-ion forklift battery packs. A second product line is LIB-based refrigeration solutions for the trucking industry. Launched in October 2019, the Fridge.

Why is a lack of standards for storage batteries a problem in SA?

Lack of standards for storage batteries in SA allows import of sub-standard and uncertified products to be the detriment of the market (reputational damage of the technology) and local manufacturers. Lack of local testing and

certification facilities hampers certification of local products and market opportunities.

How many MW of battery energy storage will South Africa deliver?

In August 2022, South African electricity supplier Eskom announced the details of 343 MW of battery energy storage deployments. The rollout is expected to serve as a proof of concept for the country's most significant delivering battery storage projects.
