

Ministry of industry and information technology releases energy storage

Overview

On Feb. 10, 2025, China's Ministry of Industry and Information Technology and other seven central government departments jointly announced an action plan for sound development of new-type energy storage system manufacturing. What is MIIT's new energy storage plan?

The plan, jointly issued by eight departments including the Ministry of Industry and Information Technology (MIIT) on Monday, seeks to foster high-quality development in the new-energy storage manufacturing.

What is the new-type energy storage manufacturing industry?

According to an action plan jointly issued by the Ministry of Industry and Information Technology and seven other government organs, the new-type energy storage manufacturing industry refers to the sector that produces energy storage, information processing, safety control, and other products related to new energy storage methods.

How will China boost technology innovation in the new-type energy storage sector?

According to the document, China will launch initiatives to boost technology innovation in the new-type energy storage sector. These initiatives will include measures to speed up the upgrading of mature technologies such as lithium batteries and support disruptive technological innovations.

How can China improve international cooperation in the energy storage sector?

To beef up international cooperation in the new-type energy storage sector, China will work to incorporate collaboration in the field into international cooperation mechanisms and frameworks such as the Belt and Road Initiative and BRICS and promote mutually beneficial cooperation on industrial and supply chains.
