

# Mobile ESS unit cost breakdown in New Zealand 2026

## Overview

---

What does the second emissions reduction plan mean for New Zealand?

While the second Emissions Reduction Plan (ERP2) ultimately seeks to progress New Zealand towards achieving the same domestic emissions reduction targets as the first Emissions Reduction Plan (ERP1), ERP2 represents a significant change in approach in how the Government intends to do so.

Will New Zealand meet the 2031 – 2035 emissions budget?

Projections have been rounded to the nearest whole number. While the reductions as projected are sufficient to allow New Zealand to achieve the second emissions budget, projections based on ERP2's policies suggest that New Zealand will fail to meet the 2031 – 2035 emissions budget under the proposals by an estimated 9.2MtCO<sub>2e</sub>.

What is an EE in ESS?

An EE in ESS challenge one another when used to address the same topic or issue. systems and societies function in the relationship under study. Owing to the interdisciplinary nature of the subject, a wide spectrum of topics could be selected to study. The most successful topics reveal take place. flights in Canada?

.

How does disruption affect the NZ ETS?

In periods of disruption resulting in changes to activity and economic shifts, some of these relationships may weaken or no longer hold. Stakeholders within the NZ ETS may also have their own sources of information or differing views on how external factors will impact emissions.

Should a EE be combined with an ESS?

A combination of both is highly recommended. An EE in ESS challenge one another when used to address the same topic or issue. systems and societies function in the relationship under study. Owing to the interdisciplinary nature of the subject, a wide spectrum of topics could be selected to study.

Are forestry NZU forecasts based on a surrender or allocation?

They are not based on when NZUs are surrendered or allocated. The forestry NZU forecasts assume foresters report their emissions every year, as per the Voluntary Emissions Reporting Period (VERP). However, foresters may report in accordance with the Mandatory Emissions Reporting Period (MERP) every 5 years.
