

# National development energy storage company 2024 new equipment issues consultation

## Overview

---

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

Is the new energy storage sector a new frontier?

The new energy storage sector has been rising fast as a new frontier, becoming a significant driver for the high-quality development of the new energy industry, he said.

How big will electrochemical energy storage be by 2027?

Based on CNESA's projections, the global installed capacity of electrochemical energy storage will reach 1138.9GWh by 2027, with a CAGR of 61% between 2021 and 2027, which is twice as high as that of the energy storage industry as a whole (Figure 3).

Will Giga storage start construction in 2024?

Two 25MW/100MWh projects were deployed in the last few years (by Nippon Koei Energy Europe and Nala Renewables respectively) and January saw Dutch developer Giga Storage claim it would start construction on a 600MW/2,400MWh project there, one of the biggest in Europe, in 2024.

How can the energy storage industry be improved?

Technological leadership, safety and stability, and economic affordability will further promote the high-quality development of the new energy storage industry and companies must keep pushing forward the upgrade of the entire energy storage industry chain, he said.

Will energy storage projects come online in 2025?

Some 880MW/1,809MWh of energy storage projects were granted contracts in the PERTE tender in December 2023. The bulk will come online in 2025, reflected in LCP's data, which shows 1.7GW/4.1GWh coming online that year.

## National development energy storage company 2024 new equipment

---

### [Energy storage capacity to see robust uptick](#)

According to Bian, new energy storage systems are playing a critical role in ensuring grid connection of renewable energy, with the equivalent utilization hours of new ...

### Transmission Development Plan 2024

This document is the consultation report on the TDP 2024-2033 (TDP 2024) consultation. It describes the consultation process and provides an overview of the submissions received, our ...
