

# **National standard for energy storage 34131**

## Overview

---

GB/T 34131-2023 (GB "Battery") specifies the requirements for data acquisition, communication, alarm and protection, control, energy state estimation, balance, insulation resistance detection, insulation withstand voltage, electrical adaptability, and electromagnetic compatibility of the battery management system. ( )

GB/T 34131-2023 (GB "Battery") specifies the requirements for data acquisition, communication, alarm and protection, control, energy state estimation, balance, insulation resistance detection, insulation withstand voltage, electrical adaptability, and electromagnetic compatibility of the battery management system. ( )

Systems of energy storage battery flow. Part 2-2. Requirements. (GB "Battery") specifies the requirements for data acquisition, communication, alarm and protection, control, energy state estimation, balance, insulation resistance detection, insulation withstand voltage, electrical adaptability, and electromagnetic compatibility of the battery management system. ( )

(GB "Battery") specifies the requirements for data acquisition, communication, alarm and protection, control, energy state estimation, balance, insulation resistance detection, insulation withstand voltage, electrical adaptability, and electromagnetic compatibility of the battery management system. ( )

This document specifies the requirements for data acquisition, communication, alarm and protection, control, energy state estimation, balance, insulation resistance detection, insulation withstand voltage, electrical adaptability, and electromagnetic compatibility of the battery management system.

This document specifies the requirements for data acquisition, communication alarm and protection, control, state of energy estimation, balancing, insulation resistance detection, insulation and voltage withstand, electrical adaptability, electromagnetic compatibility, etc., describes the.

This document replaces GB/T 34131-2017 Technical standard for battery
