## Overview

---

The company's systems are designed for medium and long-duration storage – with capacities ranging from 10 MWh to 10 GWh. They can be deployed anywhere. The systems are very compact, with high energy density, small carbon footprint and very low energy loss.

Our ThermalBattery™ stores energy in the form of heat and releases it when needed to supply your processes with process heat or steam. Does your production need process heat/steam from approx. 120 °C up to and beyond 300 °C?

\* Does your company have a PPA based on renewable energies or own.

ENERGYNEST is a thermal energy storage company founded in 2011 by Professor Pål Bergan and Øivind Resch. The company is headquartered in Billingstad, Norway. Other branches are located in Hamburg, Seville, Madrid and Rotterdam. The company manufactures industrial scale thermal energy storage.

NEST now stands as Taiwan's largest energy storage system safety testing laboratory and one of the world's premier facilities in this field. Equipped with cutting-edge laboratories for fire, combustion, vibration, and environmental testing, NEST boasts a 360 kW/360 kWh energy storage system safety.

EnergyNest's Thermal Energy Storage is changing the energy storage game with a system of modular storage elements. This simplicity is what makes it surprisingly smart. EnergyNest Thermal Energy Storage is scalable, durable, and easy to install and operate. The ThermalBattery stores heat energy from.

ENERGYNEST provides flexible and cost-effective thermal energy storage (TES) systems that enable industry to decarbonize heat. Our solutions focus

on power-to-heat applications and on optimizing the use of renewable electricity and electricity markets for energy-intensive manufacturing. Founded in.

EnergyNest is working to make large-scale thermal energy storage globally viable. Its thermal battery enables power producers and energy-intensive industries to utilise excess heat in a flexible manner. A global energy transition is underway. The future electricity supply will be dominated by.
