

New energy lithium battery energy storage patent

Overview

The research highlights two prominent factors in the field of grid-connected LIB ESS patents. Firstly, a detailed patent bibliometric analysis including patent growth trends, keyword analysis, patent distribution over jurisdiction, and subject categories was presented.

The research highlights two prominent factors in the field of grid-connected LIB ESS patents. Firstly, a detailed patent bibliometric analysis including patent growth trends, keyword analysis, patent distribution over jurisdiction, and subject categories was presented.

The advent of new energy storage technologies has identified them as key components for shaping innovative power systems, which are essential in achieving carbon peak and carbon neutrality goals. This paper leverages patent data to explore the developmental trends and research status of emerging.

In 2022, China released the "14th Five Year Plan" for the development and implementation of new energy storage, which involves lithium battery technology in solid-state lithium-ion batteries, liquid lithium (/sodium) metal batteries, and their large-scale commercial applications. It can be expected. Are lithium-ion battery energy storage systems sustainable?

Presently, as the world advances rapidly towards achieving net-zero emissions, lithium-ion battery (LIB) energy storage systems (ESS) have emerged as a critical component in the transition away from fossil fuel-based energy generation, offering immense potential in achieving a sustainable environment.

How many patents are there in energy storage system?

Firstly, using the "energy storage system" a total of 847,461 ($n = 847,461$) patents were found. Secondly, "battery" was used and a total of 272,904 ($n = 272,904$) patents were obtained.

What are the goals of a lithium battery patent?

According to the United States national blueprint for lithium batteries , one of the main goals is stated as to maintain and advance United States battery technology leadership by strongly supporting scientific R&D, STEM education, and workforce development which is directly aligned with the claim with the patent [109, 174, 176].

When was lithium ion first used in battery storage?

According to , the first mention of lithium-ion in battery storage is published in 1976 . After that, several decades have passed and many researchers have developed and published various processes or ideas regarding LIB construction and application.

What are the components of a lithium battery design system?

LIB has several components of the design system that are multi-component artefacts that enable us to track the growth of expertise at several stages . According to Malhotra et al. , LIBs are composed of three major systems such as; battery chemistry (cell), battery internal system and battery integration system as shown in Fig. 2.

Is Dalian flow battery energy storage the world's largest grid-connected battery storage system?

Recently, Dalian Flow Battery Energy Storage Peak-shaving Power Station situated in Dalian, China was connected to the grid with a capacity of 400 MWh and an output of 100 MW is considered the world's largest grid-connected battery storage system .

New energy lithium battery energy storage patent

Grid-connected lithium-ion battery energy storage system towards

Finally, for the patent landscape analysis on grid-connected lithium-ion battery energy storage, a final dataset consisting of 95 (n = 95) patent documents is developed and ...

Solid-state / Semi-solid Li-ion Battery Innovation & Patent ...

Focus of this Review In this review, technical options are discussed that are being evaluated by key solid-state / semi-solid lithium-ion battery companies towards the launch of ...

Dragonfly Energy and Airstream® Announce Expanded Partnership

At the forefront of domestic lithium battery cell production, Dragonfly Energy's patented dry electrode manufacturing process can deliver chemistry-agnostic power solutions ...

Dragonfly Energy to be Granted U.S. Patent in Continued ...

Dragonfly Energy to be granted a new U.S. patent addressing the streamlined production of conventional Li-ion ion batteries and

nonflammable solid-state lithium batteries in ...

New Energy Company-Lithium Battery-home energy storage ...

We specialize in manufacturing lithium batteries, home energy storage batteries, PV inverters, solar PV systems, and are committed to providing you with cleaner and more convenient energy.

Battery revolution to evolution

The revolutionary work of John Goodenough, M. Stanley Whittingham and Akira Yoshino has finally been awarded the Nobel Prize in Chemistry. Scientific discovery and ...

[Lithium Storage Solutions: The Future of Energy Storage](#)

IntroductionAs the global energy sector transitions towards renewable sources, the demand for efficient, scalable, and long-duration energy storage solutions has surged. At ...

[A nonflammable battery to power a safer, ...](#)

A new platform for energy storage Although the batteries don't quite reach the energy density of lithium-ion batteries, Varanasi says Alsym is ...

Analysis of China's patent landscape for new energy storage ...

This paper leverages patent data to explore the developmental trends and research status of emerging energy storage technologies in China, including electrochemical, compressed air, ...

Technological trajectory analysis in lithium battery manufacturing

We propose the significance of patent claims in the technological trajectory of lithium battery manufacturing (LBM-Tra) research. And we construct a more robust attention ...

[Lithium Storage Solutions: The Future of Energy Storage](#)

IntroductionAs the global energy sector transitions towards renewable sources, the demand for efficient, scalable, and long-duration ...

Patent landscape on NMC lithium-ion batteries

NMC battery IP activity is ramping up along with the market. Since their development in the early 1990's, lithium-ion batteries have become an ...

Explaining IP's role in battery energy storage systems

The days when batteries were simple chemical-based means of storing energy are history. The modern and rapidly evolving age of battery power is built upon sophisticated ...

akacje10.waw.pl

With the rise of new energy power generation, various energy storage methods have emerged, such as lithium battery energy storage, flywheel energy storage (FESS), supercapacitor, ...

EVE Energy Secures Lithium Battery Structure Patent to Enhance

Huizhou EVE Energy Co., Ltd. has recently secured a patent for a new lithium battery structure, enhancing the stability of battery performance.

[New Energy Company-Lithium Battery-home energy ...](#)

We specialize in manufacturing lithium batteries, home energy storage batteries, PV inverters, solar PV systems, and are committed to providing you with ...

[Huawei plans to invent solid-state battery tech.](#)

Huawei has recently issued a new patent regarding solid-state battery tech. It would be a wonderful implementation in the energy storage ...

Lithium battery energy storage new technology and patents

According to the United States national blueprint for lithium batteries, one of the main goals is stated as to maintain and advance United States battery technology leadership by strongly ...

Allegro secures U.S. patent for its in next-generation energy storage

Australian renewable energy start-up Allegro Energy has been granted a US patent for micro-emulsion electrolyte technology, which addresses "critical limitations of ...

US6617075B2

Lithium-based battery cells are an attractive energy source for portable applications, due in part to their ability to provide relatively high energies and long cycle life. Lithium is the lightest of all ...

Energy Storage Solutions: Patent Law Challenges in Battery ...

For businesses developing battery technologies, this shift represents a massive opportunity, but also requires a keen understanding of where the industry is headed. New ...

Battery Patent Wars Escalate: LithiumHub's ITC Case & Global IP

To effectively respond to both internal and external competitive pressures, patent protection in the new energy battery industry should focus on three key aspects: core ...
